WORK EXPERIENCE

14/07/2022 – 14/10/2022

StarLabs Company

Internship at StarLabs Company

- o Worked with Jira Software for Task Management and Confluence for documentation.
- o Worked with SQL Database, ASP.NET Core Web App (MVC) for back-end, HTML5, CSS3, Javascript for front-end, GitHub for Source Control.
- o Organized, Planed and Seperated tasks with team.
- o Worked with some frameworks like EntityFramework, AutoMap, Identity etc.
- o Learned a lot about working with a team.

01/12/2022 – 05/06/2023

Alaturka Company

- o Developed and maintained server-side applications using Node.js
- o Collaborated with front-end developers to design and implement RESTful APIs for data exchange.
- o Conducted code reviews to ensure code quality and performance.
- o Worked with some frameworks and libraries like NestJs, Fastify, socket.io, express, nats, passport etc.

01/08/2023 – Present	**Betting System Development**

- o Working on designing and maintaining a complete betting system platform.
- o Backend: Node.js with MySQL and MongoDB for hybrid data management.
- o Developed APIs for betting logic, user transactions, and real-time odds management.
- o Converted endpoints from a legacy PHP project into modern Node.js endpoints, restructuring the entire project for performance and scalability.
- o Implemented features: CashOut, multi-bet, casino integrations, and reporting.
- o Designed scalable architecture for multi-role access (Admin, Reseller, Shop, User).
- o Integrated monitoring, logging, and secure authentication.

EDUCATION AND TRAINING

2016–2019	**High School Degree**

Gymnasium "Jeta e Re", Suharekë (Kosovo)

2019–2023	**Bachelor's Degree in Computer Science and Engineering**

University of Business and Technology (UBT), Department of Computer Science and Engineering, Prishtina (Kosovo).

05/11/2018 - 05/02/2019	**Cetificate in Course of Python "Basic Programming"**

Jcoders Acadamey, Prizren, (Kosovo)

- This course gave me a lot of techniques in these fields: Data Types, usage of arithmetic, relational and logic operators, variables, controll flow, loops, lists, functions, files I/O, object oriented principles and classes/objects.

25/02/2019 - 25/04/2019	**Certificate in the module of Arduino Platform and C Programming**

Jcoders Acadamey, Prizren, (Kosovo)

- This course gave me a lot of techniques in these fields: the Basic of C Programming, Programming different Arduino Modules, Reciving data with the help of sensors, Sound Sensor and Different kind of motors.

11/10/2021 - 15/10/2021	**Certificate in the training "Startup Bootcamp"**

Innovation Centre Kosovo, Prishtinë

- This course gave me a lot of techniques in these fields: Business Planning, Product & Service Development, Business Model Canvas, Marketing & Sales, Pitch & Presentation skills.

- **Pharmacy Stock Management System** – Multi-client system for medical product inventory, expiry tracking, barcode scanning, and low stock notifications. Built with Node.js and Vue.js.

- **Personalized Diet & Wellness Platform** – Questionnaire-based SaaS to generate custom diet plans with payment integration and PDF generation.

- **CS 1.6 Server Management Platform** – Full-stack web application with a Vue.js frontend and Node.js backend for managing CS 1.6 servers. Features include real-time RCON console and log streaming, live player/session tracking, player stats editor, daily/level rewards and VIP management, ban/kick tools, and role-based admin dashboards powered by WebSockets and MySQL.

- **Uptime & Project Monitoring Platform** – Lightweight monitoring system that checks configured domains every 5 minutes to detect downtime or slow responses. Provides incident history, uptime percentages, and alert notifications via email. Built with Node.js, Express, cron jobs, and MongoDB, with a Vue.js dashboard for managing monitored projects.
